Dear Dilip:

Thank you for presenting the keynote address, "Winning Again and Again", to our company. I appreciate the preparation that you put into the presentation in order to customize it for us so that the message was right on point. You did a very professional job of incorporating our core values and 2011 strategic plan into your talk so that it was very meaningful and relevant to each person.

The feedback from your presentation was positive across the board, with many indicating that it was the highlight of our day. Your key points were eloquently reinforced with vivid stories that brought a practical application to the motivational information.

Again, thank you for a job very well done!

Sincerely,

Bob Fogal
