Unlock Your Creative Genius!

**Amazing Mind Mapping Workshop shows you that you are
smarter than you think you are!**

Mind Mapping will ...

- ✓ **Improve** your thinking, planning, and problem solving skills
- ✓ **Increase** your ability to generate ideas and organize them
- ✓ **Give** you a powerful new way to take & make notes & study new information
- ✓ **Save time** in preparing presentations & planning more effective meetings
- ✓ **Help** you identify your goals & values
- ✓ **Wake up** your brain and make thinking FUN!

Mind Mapping is a system of using your mind so that you employ both your logical left brain and your imaginative right brain while “mapping” out your thinking. The power of this synergistic thinking is that you liberate your creativity, literally wake up parts of your brain, and discover the joy of tapping your unique genius.

Register TODAY for the next Mind Mapping Workshop.

Advanced registration required. See enclosed registration form for details.

What some participants say:

“Dr. Dilip’s Mind mapping course is a quick trip to self-awareness. Mind mapping is a surprisingly pleasant tool for using our most important resource in a totally new way. You can significantly increase your note taking, analysis, planning, and organizational skills.”
Chris Perks, Professional (Civil) Engineer

“I feel I have been shown a key to unlocking the flood of creativity I know is inside me. Dr. Dilip’s enthusiasm and the interest he showed in his students makes the class more of an experience than a workshop.”
Fred Callbeck, Systems Professional
Grumman Systems Support

“(I learned) an excellent new tool/skill and increased confidence in front of others – also, more appreciation for my brain and creativity. I know I’ll continue to use Mind mapping in my daily life.”
Kerry Featherer, Real Estate Sales/Mary Kay

“I learned a new way to think. I learned to focus in a new and fascinating way. It was informative, helpful, eye opening. It was literally mind- expanding.”

James Michaelson, Professor, Rowan College

“It (Mind Mapping) is a very unique and undoubtedly valuable skill. There is a freedom in Mind Mapping that the rigidity of an outline does not have. I hope, in fact I am certain, that my continual use of it will help me learn, study, problem solve, and understand better.”

Janine Cunningham, DNREC, Div. of Fish & Wildlife

“(Value I gained): creatively organizing my thoughts, ability to think freely, new ideas and concepts that are applicable to my life. (The quality of instruction) was excellent.”

Judie Rodgers, Human resources Specialist, Du Pont

“Very useful tool. Excellent! Well organized.”
Steve Steinwedel, Coach, SCS Enterprises, Inc.
